Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

American Literature and American Identity addresses the crucial issue of identity formation, especially national identity, in influential works of American literature. Patrick Colm Hogan uses techniques of cognitive and affective science to examine the complex and often highly ambivalent treatment of American identity in works by Melville, Cooper, Sedgwick, Apess, Stowe, Jacobs, Douglass, Hawthorne, Poe, and Judith Sargeant Murray. Hogan focuses on the issue of how authors imagined American identity—specifically, as universal, democratic egalitarianism—in the face of the nation's clear and often brutal inequalities of race and sex. In the course of this study, Hogan advances our understanding of nationalism in general, American identity in particular, and the widely read literary works he examines.

Compare our prices! The purpose of this study guide is to assist candidates in preparing for the NCTRC national certification examination for Certified Therapeutic Recreation Specialists. We are excited to tell you that this fifth edition of the Study Guide for the Therapeutic Recreation Specialist Certification Examination has changed significantly from previous editions. This is largely due to two reasons: (a) the National Council for Therapeutic Recreation Certification (NCTRC) has recently updated the Job Analysis, which helps structure the content of the test, and (b) the computerized test has a newer format of a 150-item test. Therefore, we have restructured the Study Guide to align more closely with the most recent NCTRC exam content and format. In addition, we've added over 100 new items for a total of over 850 practice test items! The Study Guide offers over 250 random practice items, plus four practice exams, each with 150 items distributed across the job analysis that mirrors the national exam. In preparing this Study Guide, our mission is two-fold: (a) to provide information that helps candidates reduce test anxiety and maximize test performance, and (b) to provide numerous sample questions, similar to those actually found on the exam, that will allow candidates to practice and self-assess their own readiness for the test. For many individuals, the thought of taking a certification examination can be unsettling. We often hear statements such as, I have never taken a comprehensive exam. There is so much information. How do I learn it all? This Study Guide will help to identify areas where you need further study to help you ace your NCTRC certification examination!
