An American bioengineering research firm erects a theme park on a Caribbean island, complete with living dinosaurs, and invites a group of scientists to be its first terrified guests.

Paul Lauter, an icon of American Studies who has been a primary agent in its transformation and its chief ambassador abroad, offers a wide-ranging collection of essays that demonstrate and reflect on this important and often highly politicized discipline. While American Studies was formerly seen as a wholly subsidiary academic program that loosely combined the study of American history, literature, and art, From Walden Pond to Jurassic Park reveals the evolution of an independent, highly interdisciplinary program with distinctive subjects, methods, and goals that are much different than the traditional academic departments that nurtured it. With anecdote peppered discussions ranging from specific literary texts and movies to the future of higher education and the efficacy of unions, From Walden Pond to Jurassic Park entertains even as it offers a twenty-first century account of how and why Americanists at home and abroad now do what they do. Drawing on his forty-five years of teaching and research as well as his experience as a political activist and a cultural radical, Lauter shows how a multifaceted increase in the United States ' global dominion has infused a particular political urgency into American Studies. With its military and economic influence, its cultural and linguistic reach, the United States is—for better or for worse—too formidable and potent not to be understood clearly and critically.

This book examines the reception of rhetoric and the rhetoric of reception. By considering salient rhetorical traits of rhetorical utterances and texts seen in context, and relating this to different kinds of reception and/or audience use and negotiation, the authors explore the connections between rhetoric and reception. In our time, new media and new forms of communication make it harder to distinguish between speaker and audience. The active involvement of users and audiences is more important than ever before. This project is based on the premise that rhetorical research should reconsider the understanding, conceptualization and examination of the rhetorical audience. From mostly understanding audiences as theoretical constructions that are examined textually and speculatively, the contributors give more attention to empirical explorations of actual audiences and users. The book will provide readers with new knowledge on the workings of rhetoric as well as illustrative and guiding examples of new methods of rhetorical studies.

#1 NEW YORK TIMES BESTSELLER • From the author of Timeline, Sphere, and Congo, this is the classic thriller of science run amok that took the world by storm. Nominated as one of America ' s best-loved novels by PBS ' s The Great American Read " [Michael] Crichton ' s dinosaurs are genuinely frightening.
