'Medical technology is beneficial for well researched dangerous diseases. However, most symptoms that people bring to their primary care physician have no single clearly identifiable cause: investigations and drugs do more harm than good - and also waste resources - ' - Wilfrid Treasure *Diagnosis and Risk Management in Primary Care* teaches that adopting an evidence-based approach to primary care improves patient care and treatment outcomes. It demonstrates that brief clinical assessments, repeated if necessary, allow effective diagnosis while avoiding the costs and complications associated with more advanced testing. Adopting a fresh approach, this book sets consultation skills alongside evidence-based information by both itemising the specific techniques and facts that are needed in the consulting room, and providing detailed information on odds and likelihood ratios to quantify risk and deal with uncertainty. This book provides food for thought, and helps doctors develop communication skills that support their personal styles of consulting, encouraging a more traditional, intuitive treatment. It provides a map of the consultation and a compass to navigate through symptoms, signs and evidence - listening to their patients with one ear and, with the other, to the reflective inner voice of reason. General Practitioner Specialist Trainees and their teachers will find much of interest, as will established General Practitioners with an interest in maintaining traditional models of care. Undergraduate medical students and candidates for the MRCPG will find this an ideal reader for the clinical skills assessment. 'What a breath of fresh air to find an author capable of putting the patient back at the centre of the consultation and who is able to entertain at the same time as he informs and to stimulate critical reflection while nudging us in the direction of a rigorous approach to diagnosis, and the assessment and communication of risk.' From the foreword by Roger Jones

This beloved bestseller—over 180,000 copies sold—has helped caregivers worldwide keep themselves emotionally, psychologically, spiritually, and physically healthy in the face of the sometimes overwhelming traumas they confront every day. A longtime trauma worker, Laura van Dernoot Lipsky offers a deep and empathetic survey of the often-unrecognized toll taken on those working to make the world a better place. We may feel tired, cynical, or numb or like we can never do enough. These, and other symptoms, affect us individually and collectively, sapping the energy and effectiveness we so desperately need if we are to benefit humankind, other living things, and the planet itself. In Trauma Stewardship, we are called to meet these challenges in an intentional way. Lipsky offers a variety of simple and profound practices, drawn from modern psychology and a range of spiritual traditions, that enable us to look carefully at our reactions and motivations and discover new sources of energy and renewal. She includes interviews with successful trauma stewards from different walks of life and even uses New Yorker cartoons to illustrate her points. “We can do meaningful work in a way that works for us and for those we serve,” Lipsky writes. “Taking care of ourselves while taking care of others allows us to contribute to our societies with such impact that we will leave a legacy informed by our deepest wisdom and greatest gifts instead of burdened by our struggles and despair.”

Our market-based, profit-driven health care system in the United States has put necessary care increasingly beyond the reach of ordinary Americans. Primary health care, the fundamental foundation of all high-performing health care systems in the world, is a critical but ignored casualty of the current system. Unfortunately, primary care is often poorly understood, even within the health professions. This book describes what has become a crisis in primary care, defines its central role, analyzes the reasons for its decline, and assesses its impacts on patients and families. A constructive approach is presented to rebuild and transform U.S. primary care with the urgent goal to address the nation's problems of access, cost, quality and equity of health care for all Americans.
