This is the story of a 'sixties adman who harnessed the big ideas of his age and set out to reinvent advertising - and then change the world. In so doing he introduced interactive, PR-generating stunts, and social media - way back in the 1960s. Then he used them to save the Grand Canyon, kick-start the Green Movement, free a Caribbean island and launch Wired magazine's 'patron saint', Marshall McLuhan. And he did it all with a flamboyance that inspired the likes of Tom Wolfe, John Steinbeck and the makers of the counterculture. His name was Howard Luck Gossage. These are his life and times.

WINNER OF THE 2016 JEWISH BOOK COUNCIL AWARD FOR CONTEMPORARY JEWISH LIFE AND PRACTICE An inspiring and accessible guide, drawn from Jewish wisdom, for building the inner qualities necessary to work effectively for social justice. The world needs changing¶and you're just the person to do it! It's a matter of cultivating the inner resources you already have. If you are serious about working for social justice and change, this book will help you bring your most compassionate, wise, and courageous self to the job. Bringing positive social change to any system takes deep self-awareness, caring, determination, and long-term commitment. But polarization, the slow pace of change, and internal conflicts among activists and organizations often leads to burnout and discouragement among the very people needed to make a difference. Changing the World from the Inside Out distills centuries of Jewish wisdom about cultivating and refining the inner life into an accessible program for building the qualities necessary to accomplish sustainable change. Through explorations of deep motivation, inner-drive, and traits like trust and anger, this book engages the reader in a journey of self-development and transformation, demonstrating that sustainable activism is indeed a spiritual practice. Jaffe offers accessible and meaningful guidance for this journey¶with exercises, contemplations, and discussion points that can be used individually or in a group.

Create a world-changing venture. Silicon Valley's latest trend for creating new ventures is based on trial and error: test market needs with new product concepts and a minimum amount of capital, expect that the product may not meet the market need, so fail fast and try another product with the hope that a product-market fit will eventually emerge. But this fail fast, step-and-pivot philosophy is like taking a random walk in the forest without a compass. If You Really Want to Change the World is about helping entrepreneurs find true north. Henry Kressel and Norman Winarsky¶technologists, inventors, and investors with stellar track records¶provide a guide for those who wish to create a market-leading company that will have a real impact: a disciplined and staged approach they have used to launch, invest in, and develop scores of highly successful companies. If You Really Want to Change the World leads entrepreneurs through the critical stages of venture development, from concept to acquisition or public offering to maintaining a rich culture of innovation in the company. It is a guide by innovators for innovators, with approaches that are practical and timeless. Drawing on the authors' experiences as well as those of their partners from around the world, Kressel and Winarsky share the stories of their triumphs and misses, demonstrate their method in action, and inspire their readers in the process. There are more opportunities now than ever before to build breakthrough companies that touch millions of lives. If this is your goal, let this book be your guide to creating world-changing ventures.
