As the Internet becomes increasingly interconnected with modern society, the transition to online business has developed into a prevalent form of commerce. While there exist various advantages and disadvantages to online business, it plays a major role in contemporary business methods. Improving E-Commerce Web Applications Through Business Intelligence Techniques provides emerging research on the core areas of e-commerce web applications. While highlighting the use of data mining, search engine optimization, and online marketing to advance online business, readers will learn how the role of online commerce is becoming more prevalent in modern business. This book is an important resource for vendors, website developers, online customers, and scholars seeking current research on the development and use of e-commerce.

E-commerce Get It Right! is a Step-by-Step E-commerce guide, that will show you everything you need to know about selling and marketing physical products online. Whether you're an e-commerce Start-Up or have an existing e-commerce website that is struggling to make a profit, this book is for you.

Does your ecommerce site attract visitors but fail to convert enough of them into paying customers? Are your sales numbers not where you want? Have you got an ecommerce site but not yet spent any time on improving the design? If it's time to upgrade your website's user experience then Designing Ecommerce Websites is the only book to tell you exactly how to do it. It provides you with 66 guidelines on how to best use every element on each page of an ecommerce website. This book contains the results of a decade's worth of UX design experience, and several years spent consulting with a wide range of different ecommerce startups. It is based on knowledge learned from user behaviour data and running many different usability tests. It tells you what works in reality, not in theory. The book itself was born from teaching the principles in workshops for over four years. These are principles that are useful to a range of job roles (not just designers) and no matter what your experience level. This book will take you step by step through the ecommerce funnel that applies to almost all ecommerce sites via scannable text and simple illustrations. It's a reference book that is designed to be easy to pick up and quickly learn from. Design LANDING pages that stop users from being confused and bouncing; Create LISTINGS that help your users find a product they actually want to buy; Design PRODUCT pages that don't leave the users with any fears about buying from you; Develop a CHECKOUT flow that results in more successful payments; And learn MORE advice about the other key pages on an ecommerce site. This is the second edition of the book and it features completely rewritten and updated advice for 2019, 15 totally new guidelines, and links to further reading for every guideline (so you can learn even more). The first edition was an Amazon Kindle bestseller in the ecommerce and technology business categories.

The International Conference on E-commerce and Web Technologies (EC-Web) is a mature and well-established forum for researchers working in the area of electronic commerce and web technologies. These are the proceedings of the ninth conference in the series, which, like previous EC-Web conferences, was co-located with DEKA, the International Conference on Database and Expert Systems Applications, which, this year, took place in Turin, Italy. One key feature of EC-Web is its two-fold nature: it brings together both papers proposing technological solutions for e-commerce and the World Wide Web, and papers concerning the management of e-commerce, such as web marketing, the impact of e-commerce on business processes and organizations, the analysis of case studies, as well as social aspects of e-commerce (to understand the impact of e-commerce solutions on day-to-day life and the new opportunities that these behaviors open). The technical program included 12 reviewed papers and two invited papers. Each paper was reviewed by five reviewers, in order to select only the best quality papers. The program included five sessions: " Security in E-Commerce " (with two papers), " Social Aspects of E-Commerce " (with two papers), " Business Process and EC Inf- structures " (with three papers), " Recommender Systems and E-Negotiations " (with four papers) and " Web Marketing and User Profiling " (with three papers). We found the program interesting and we hope participants and readers feel the same. Furthermore, we hope the attendees enjoyed the conference and Turin. June 2008 Giuseppe Psaila Roland R. Wagner
