Guide Grid Revit

Guide grids help you align views on a sheet. They can also help you arrange views so they appear in the same location on several sheets. For example, in a project with multiple floor plans, use a guide grid to place the floor plans in the same location from sheet to sheet. Begin by defining a guide grid for your project.

Video: Use Guide Grids to Align Views | Revit Products ...

Revit has a tool for this called the Guide Grid. It is a slightly odd little tool that allows you to line up model elements in the same location across multiple sheets. It does this by allowing you to move the viewport on a sheet by snapping to the datum elements in your model (levels, column grids and reference planes) and then snapping them to the intersections on the Guide Grid.

Revit Tips & Tricks GUIDE GRIDS - YouTube

Robert Manna recently posted some observations about the new Guide Grid feature that arrived with Revit 2011. It is intended to provide a bit more control over the view alignment between sheets. I complained about this process in an earlier post. It was only a month or so later that I saw a sneak peak of the Guide Grid concept.
