1903. Thomas Nelson Page, author of short stories, novels, essays, and poetry, is best known for his role as literary spokesman for the glories of the Old South. Gordon Keith begins: Gordon Keith was the son of a gentleman. And this fact, like the cat the honest miller left to his youngest son, was his only patrimony. As in that case also, it stood to the possessor in the place of a good many other things. It helped him over many rough places. He carried it with him as a devoted Romanist wears a sacred scapular next to the heart. See other titles by this author available from Kessinger Publishing.

Torey Adams, a high school junior with a seemingly perfect life, struggles with doubts and questions surrounding the mysterious disappearance of the class outcast.

Like fashions and fads, food-even bad food-has a history, and Lovegren's Fashionable Food is quite literally a cookbook of the American past. Well researched and delightfully illustrated, this collection of faddish recipes from the 1920s to the 1990s is a decade-by-decade tour of a hungry American century.

When Rachel Carson died of cancer in 1964, her four books, including the environmental classic Silent Spring, had made her one of the most famous people in America. This trove of previously uncollected writings is a priceless addition to our knowledge of Rachel Carson, her affinity with the natural world, and her life.

This revised 2nd edition emphasizes the biological aspects of wastewater treatment that are valuable to operators and technicians in understanding and regulating their treatment processes. Presents the description, ecology, and functions (both beneficial and detrimental) of organisms and microorganisms (the microlife) found in wastewater treatment processes. This volume of the Wastewater Biology series is valuable to wastewater professionals such as sanitary engineers, chemists, microbiologists, and educators. Generously illustrated with a minimum of technical jargon. Updates the original text; adds significantly to the chapters on the microscope, filamentous microorganisms, metazoa and photomicroscopy; and provides specific chapters on the microorganisms and the bacteria.

Does culture matter? This question has taken on added significance since fundamentalist revivalism has recently gained ground in different parts of the world. The old controversy between Max Weber and Karl Marx, which centres around the extent to which cultural factors such as social norms and values affect economic growth is of critical importance, particularly because of its policy implications. Indeed, if culture is not an autonomous factor susceptible to influencing economic realities, it should not matter and public authorities can dispense with thinking about cultural interventions. On the other hand, if culture does have a real impact, the question arises as to whether it is conducive or detrimental to economic growth, political liberalisation, and the emancipation of individuals among other things. Culture, Institutions, and Development addresses this debate at a concrete level by looking at five important issues: the role of tradition and its influence on development, the role of religion, with special reference to Middle Eastern countries; the role of family, kinship, and ethnic ties in the process of development, the relationship between culture and entrepreneurship, and the relationship between culture and poverty. This collection offers a nuanced view that neither denies nor exaggerates the role of cultural factors in explaining relative growth performances across countries. Instead, the contributors focus on the dynamic, two-way relationship between culture and development in a way that stresses policy stakes and the value of multidisciplinary collaboration between economists, historians and other social scientists. This book will be of interest to postgraduates and researchers in all the social sciences, as well as to professionals working in national development agencies, international organisations, and Non-Governmental Organisations.

Ocean Sliker has come back to Harkness, New Brunswick in defeat, after failing to set New York on fire with her playwriting. The first item on her agenda? Climbing White Crow Cliff, where her best friend Lacey Douglas died six years ago. If she conquers the mountain, perhaps she can rediscover her courage. But the only thing she finds herself is...lost. Family obligations have left Titus Standish stuck in Harkness. While his younger siblings went off into the world, he stayed, working the farm and running the local search and rescue. He was there when Lacey fell to her death and blames himself. He dreads the day another mission takes him up there again. But when Ocean 's mother calls, concerned that her daughter is wandering the mountain, he leaps into action. Ocean is thrilled to be found...until she sees her savior. She 's known Titus Standish all her life, and has loved him almost that long. But at four years his junior, she was just a kid with a crush. When Titus finds her, he 's determined to march her back down the mountain to safety. But Ocean has other plans; she 'll be damned if she 'll give up this trek. Yet all trails seem to lead to one place...straight into Titus 's arms.

Through an innovative and interdisciplinary approach that combines critical sociolinguistic ethnography, multi-modality, reflexivity, and discourse analysis, this groundbreaking book reveals the multiple (and sometimes simultaneous) ways in which individuals engage and invest in representations of languages and identities.This timely work is the first to consider the significance of multilingualism and its relationship to citizenship as well as the development of linguistic repertoires as an essential component of language education in a globalized world. While examining the discourses and interconnections between multilingualism, globalization, and identity, the author draws upon a unique case study of the experiences, voices, trajectories, and journeys of Canadian youth of Italian origin from diverse social, geographical, and linguistic backgrounds, participating in university French language courses as well as training to become teachers of French in the urban, multicultural and global landscape of Toronto, Canada. In doing so, Byrd Clark skillfully illustrates the multidimensional ways that youth invest in language learning and socially construe their multiple identities within diverse contexts while weaving in and out of particularistic and universalistic identifications. This invaluable resource will not only shed light on how and why people engage in learning languages and for which languages they choose to invest, but will offer readers a deeper understanding of the complex interrelationships between multilingualism, identity, and citizenship. It will appeal to researchers in a variety of fields, including applied linguistics, sociolinguistics, language acquisition and linguistic anthropology.
