In a book that marks the author's 20th year of uncovering suppressed information, he takes the manipulation of the human race and the nature of reality to new levels of understanding and calls for humanity to rise from its knees and take back the world from the sinister network of families and non-human entities that covertly control us from cradle to grave. Original.

In Thomas Ligotti's first nonfiction outing, an examination of the meaning (or meaninglessness) of life through an insightful, unsparing argument that proves the greatest horrors are not the products of our imagination but instead are found in reality. "There is a signature motif discernible in both works of philosophical pessimism and supernatural horror. It may be stated thus: Behind the scenes of life lurks something pernicious that makes a nightmare of our world." His fiction is known to be some of the most terrifying in the genre of supernatural horror, but Thomas Ligotti's first nonfiction book may be even scarier. Drawing on philosophy, literature, neuroscience, and other fields of study, Ligotti takes the penetrating lens of his imagination and turns it on his audience, causing them to grapple with the brutal reality that they are living a meaningless nightmare, and anyone who feels otherwise is simply acting out an optimistic fallacy. At once a guidebook to pessimistic thought and a relentless critique of humanity's employment of self-deception to cope with the pervasive suffering of their existence, The Conspiracy against the Human Race may just convince readers that there is more than a measure of truth in the despairing yet unexpectedly liberating negativity that is widely considered a hallmark of Ligotti's work.

A major pandemic of the century has struck the world again. On top of that, smart technology is rapidly invading our lives, dramatically changed the way we live, work, play, and communicate. While life is becoming faster and more convenient, humans' wellbeing and mental health are deteriorating. Some are losing jobs to COVID-19 and technological advancement. Others are facing difficulty keeping pace with the sudden changes. Most importantly, we seem lost. Is our livelihood being threatened? Are our days numbered?How do we survive the post-pandemic era and smarter, faster machines? The good news is, by reprogramming our physical and psychological DNA,WE will thrive! This book is about how we can: Redefine Humans and Being Humans in the New World Order Grasp Nature's Laws and Universal Principles to Grow from Good to Great Apply Proven Systems to Increase Agility, Resilience, and Entrepreneurial Spirit Gain Insights from our Forefathers to Rethink the Meaning of Life Tap into the Human Spirit within us and Go Forth Courageously

A New York Times Notable Book of 2014 We are doomed to repeat history if we fail to learn from it, but how are we affected by the forces that are invisible to us? What role does Neanderthal DNA play in our genetic makeup? How did the theory of eugenics embraced by Nazi Germany first develop? How is trust passed down in Africa, and silence inherited in Tasmania? How are private companies like Ancestry.com uncovering, preserving and potentially editing the past? In The Invisible History of the Human Race, Christine Kenneally reveals that, remarkably, it is not only our biological history that is coded in our DNA, but also our social history. She breaks down myths of determinism and draws on cutting - edge research to explore how both historical artefacts and our DNA tell us where we have come from and where we may be going.

"If a mother can kill her own children, then what can be next?" Mother Teresa once asked. What indeed? Once the value of human life has been depreciated, as in Roe v. Wade and the Baby Doe Case, no one is safe. Once "quality of life" is substituted for the absolute value of human life itself, we all are endangered. Already respected scientists are calling for a time period following birth (a week or so) to decide if newborns have "sufficient quality of life" to be allowed to live. Already committees of "medical professionals" would like to decide whether the "quality of life" of the elderly or anyone seriously ill is high enough to allow them to go on living. In this moving book, the renowned pediatric surgeon and Surgeon General of the United States, C. Everett Koop, M.D., joins with one of the leading Christian thinkers of our day, Francis A. Schaeffer, to analyze the widespread implications and frightening loss of human rights brought on by today's practices of abortion, infanticide, and euthanasia. They see the present as a crucial turning point. Choices are being made that undermine human rights at their most basic level. Practices once labeled "unthinkable" are now considered acceptable. The destruction of human life, young and old, is being sanctioned on an ever-increasing scale by the medical profession, by the courts, by parents, and by silent citizens. "But what can I do?" you ask. "I'm just one person." You can start by reading this book. Yes, it will shock you. And it will make you weep. But it will also help you see how you can actually make a difference.

Is there really a human race? Is it going on now all over the place? When did it start? Who said, "Ready, Set, Go"? Did it start on my birthday? I really must know. With these questions, our hero's imagination is off and running. Is the human race an obstacle course? Is it a spirit? Does he get his own lane? Does he get his own coach? Written with Jamie Lee Curtis's humor and heart and illustrated with Laura Cornell's worldly wit, Is There Really a Human Race? Is all about relishing the journey and making good choices along the way/because how we live and how we love is how we learn to make the world a better place, one small step at a time.

In the tradition of Silent Spring and The Sixth Extinction, an urgent, meticulously researched, and groundbreaking book about the ways in which chemicals in the modern environment are changingand endangeringhuman sexuality and fertility on the grandest scale, from renowned epidemiologist Shanna Swan. In 2017, author Shanna Swan and her team of researchers completed a major study. They found that over the past four decades, sperm levels among men in Western countries have dropped by more than 50 percent. They came to this conclusion after examining 185 studies involving close to 45,000 healthy men. The result sent shockwaves around the globebut the story didn't end there. It turns out our sexual development is changing in broader ways, for both men and women and even other species, and that the modern world is on pace to become an infertile one. How and why could this happen? What is hijacking our fertility and our health? Count Down unpacks these questions, revealing what Swan and other researchers have learned about how both lifestyle and chemical exposures are affecting our fertility, sexual developmentpotentially including the increase in gender fluidityand general health as a species. Engagingly explaining the science and repercussions of these worldwide threats and providing simple and practical guidelines for effectively avoiding chemical goods (from water bottles to shaving cream) both as individuals and societies, Count Down is at once an urgent wake-up call, an illuminating read, and a vital tool for the protection of our future.

Our world is seeded with landmine of hate, moral deficiencis, inequalities, and collaboration with evil! The greatest enemy of the human race, a major roadblock to genuine integration, equality, and peaceful coexistence is hate and the spread of it.

With humor and powerful insight, the author exposes what he sees as the mental and emotional prisons which billions of people have built around themselves. Original.
