A chic peek at the glittering inhabitants of Paris's most exclusive neighborhood With the sting of a good Camembert, Kate Muir's fiction debut is a sophisticated, fun, and delightfully ironic look at family life, Left Bank style. Olivier and Madison Malin are the toasts of Rive Gauche. A philosopher and media personality, Olivier is the darling of the Paris cafés with his perfectly tousled hair and mistress de jour on speed dial. An American film star turned Parisian "It" girl, Madison busies herself playing the part of the bon vivant. But when a crisis occurs with their daughter, these self-centered parents are forced to focus on something more than their own reflections. Left Bank is at once a delicious satire of Parisian pretension and a celebration of the city's alluring glamour.

One man's journey, from fatherless, poverty-stricken child growing up in an unlovely Scottish fishing village in the 70s, through teenage angst, falling in love, going to London, living in squats, a spot of male prostitution on the side, to fabulously wealthy, feted Young British Artist, the most notorious of his generation: WEST COAST is the unputdownable, epic story of Fergus MacFarlane. It's for anyone who has ever dreamed of escaping their small town, of making it big, of leaving everything behind... And what can happen to you when you get all of that and realise that perhaps, after all, it's not really worth it.

"Thanks to this gripping new book ... we know more about how they do it. And it's even more shocking than you think." --The Independent When most people think of the drama of global finance, they think of stocks and bonds, venture capital, high-tech IPOs, and complex mortgage-backed securities. But commodities? Crude oil and soybeans? Copper and wheat? What could be more boring? That's exactly what the elite commodity traders want you to think. They don't seek the media spotlight. They don't want to be as famous as Warren Buffett or Bill Gross. Their astonishing wealth was created in near-total obscurity, either in closely held private companies or deep within large banks and corporations, where commodity profits and losses weren't broken out. Now Kate Kelly, the bestselling author of Street Fighters, takes us inside this secretive inner circle that controls so many things we all depend on. She gets closer than any previous reporter to understanding these whip-smart, aggressive, and often egomaniacal men who bet millions every day on a blend of facts, analysis, and pure gut instinct.

Modern, passionate and crazy New York is contrasted with the austerity of Scotland and the plight of the suffragettes earlier this century in this, Kate Muir's debut novel.

'Heart to Heart' is a new novel from the bestselling author of 'Left Bank'.

From Kevin Brockmeier, one of this generation's most inventive young writers, comes a striking new novel about death, life, and the mysterious place in between. The City is inhabited by those who have departed Earth but are still remembered by the living. They will reside in this afterlife until they are completely forgotten. But the City is shrinking, and the residents clearing out. Some of the holdouts, like Luka Sims, who produces the City's only newspaper, are wondering what exactly is going on. Others, like Coleman Kinzler, believe it is the beginning of the end. Meanwhile, Laura Byrd is trapped in an Antarctic research station, her supplies are running low, her radio finds only static, and the power is failing. With little choice, Laura sets out across the ice to look for help, but time is running out. Kevin Brockmeier alternates these two storylines to create a lyrical and haunting story about love, loss and the power of memory.

"The definitive work on the West's water crisis." --Newsweek The story of the American West is the story of a relentless quest for a precious resource: water. It is a tale of rivers diverted and dammed, of political corruption and intrigue, of billion-dollar battles over water rights, of ecological and economic disaster. In his landmark book, *Cadillac Desert*, Marc Reisner writes of the earliest settlers, lured by the promise of paradise, and of the ruthless tactics employed by Los Angeles politicians and business interests to ensure the city's growth. He documents the bitter rivalry between two government giants, the Bureau of Reclamation and the U.S. Army Corps of Engineers, in the competition to transform the West. Based on more than a decade of research, *Cadillac Desert* is a stunning expose and a dramatic, intriguing history of the creation of an Eden--an Eden that may only be a mirage. This edition includes a new postscript by Lawrie Mott, a former staff scientist at the Natural Resources Defense Council, that updates Western water issues over the last two decades, including the long-term impact of climate change and how the region can prepare for the future.

"A big, bold book about public lands . . . The Desert Solitaire of our time." --Outside A hard-hitting look at the battle now raging over the fate of the public lands in the American West--and a plea for the protection of these last wild places The public lands of the western United States comprise some 450 million acres of grassland, steppe land, canyons, forests, and mountains. It's an American commons, and it is under assault as never before. Journalist Christopher Ketcham has been documenting the confluence of commercial exploitation and governmental misconduct in this region for over a decade. His revelatory book takes the reader on a journey across these last wild places, to see how capitalism is killing our great commons. Ketcham begins in Utah, revealing the environmental destruction caused by unregulated public lands livestock grazing, and exposing rampant malfeasance in the federal land management agencies, who have been compromised by the profit-driven livestock and energy interests they are supposed to regulate. He then turns to the broad effects of those corrupt politics on wildlife. He tracks the Department of Interior's failure to implement and enforce the Endangered Species Act--including its stark betrayal of protections for the grizzly bear and the sage grouse--and investigates the destructive behavior of U.S. Wildlife Services in their shocking mass slaughter of animals that threaten the livestock industry. Along the way, Ketcham talks with ecologists, biologists, botanists, former government employees, whistleblowers, grassroots environmentalists and other citizens who are fighting to protect the public domain for future generations. This Land is a colorful muckraking journey--part Edward Abbey, part Upton Sinclair--exposing the rot in American politics that is rapidly leading to the sell-out of our national heritage. The book ends with Ketcham's vision of ecological restoration for the American West: freeing the trampled, denuded ecosystems from the effects of grazing, enforcing the laws already in place to defend biodiversity, allowing the native species of the West to recover under a fully implemented Endangered Species Act, and establishing vast stretches of public land where there will be no development at all, not even for recreation.

INSPIRED BY ACTUAL EVENTS Fifteen-year-old Jane Austen dreams of three things: doing something useful, writing something worthy, and falling madly in love. When she visits her brother in Kent to celebrate his engagement, she meets wealthy, devilishly handsome Edward Taylor—a fascinating young man who is truly worthy of her affections. Jane knows a match between her and Edward is unlikely, but every moment she spends with him makes her heart race—and he seems to return her interest. Much to her displeasure, however, there is another seeking his attention Unsure of her budding relationship, Jane seeks distraction by attempting to correct the pairings of three other prospective couples. But when her matchmaking aspirations do not all turn out as anticipated, Jane discovers the danger of relying on first impressions. The human heart cannot be easily deciphered, nor can it be directed or managed. And if others must be left to their own devices in matters of love and matrimony, can Jane even hope to satisfy her own heart?

Centered in Rome but transporting us into worlds as varied and alluring as they are emotionally real, Francesca Marciano's stories paint landscapes that are populated—vividly, hauntingly—by animals: from violent seagulls and starlings circling the evening sky in exhilarating formation to magical snakes and a tiny dog on the side of a deserted road. In unforgettable, cinematic frames, events unfold, especially in the lives of women. An affair ends painfully at a dinner table, an actress's past comes crashing down on her during an audition, an unhappy wife seeks respite in a historic palazzo subplot. Two starkly different couples imagine parenthood during a Greek island holiday and a young girl returns from rehab, deciding to set out anew with a traveling circus. A man in crisis draws his ex-lover deep into the New Mexico desert. With spellbinding clarity, the six masterly stories in *Animal Spirit* inhabit the minds and hearts of Marciano's characters. They chronicle deeply human moments of realization and recognition, indelible instants of irrevocable change—epiphanies sometimes sparked by our connection with animals and the primal power they show us.
