Katz's new book, Looking at Art with Alex Katz, is essentially the same concept, just on the page, cycling through 90 of Katz's favorite paintings, accompanied by blunt recollections of the work or his friendships with the artists who made them. Having famously survived the various fine-art bubbles and style cycles of New York City during his 60 years of painting, the book is less a tell-all and more a seen-it-all.

This unique series of paintings takes the viewer on a graphic, visionary journey through the physical, metaphysical, and spiritual anatomy of the self. From anatomically correct rendering of the body systems, Grey moves to the spiritual/energetic systems with such images as "Universal Mind Lattice," envisioning the sacred and esoteric symbolism of the body and the forces that define its living field of energy. Includes essays on the significance of Grey's work by Ken Wilber, the eminent transpersonal psychologist, and by the noted New York art critic, Carlo McCormick.

A 20th anniversary edition of the art classic that celebrates the intersection of creative expression and spirituality—from one of the greatest living artists of our time Twenty years after the original publication of *The Mission of Art*, Alex Grey's inspirational message affirming art's power for personal catharsis and spiritual awakening is stronger than ever. In this special anniversary edition, Grey—visionary painter, spiritual leader, and best-selling author—combines his extensive knowledge of art history with his own experiences in creating art at the boundaries of consciousness. Grey examines the roles of conscience and intention in the creative process, including practical techniques and exercises useful in exploring the spiritual dimensions of art. Challenging and thought-provoking, *The Mission of Art* will be appreciated by everyone who has ever contemplated the deeper purpose of creative expression.

Edited by Klaus Albrecht Schroder. Text by Felix Zdenek, Marietta Mautner Markhof, Werner Spies.

A must-buy for Alex Ross' legion of fans!

"If John Berger's *Ways of Seeing* is a classic of art criticism, looking at the 'what' of art, then David Salle's *How to See* is the artist's reply, a brilliant series of reflections on how artists think when they make their work. The 'how' of art has perhaps never been better explored." —Salman Rushdie *How does art work? How does it move us, inform us, challenge us?* Internationally renowned painter

David Salle's incisive essay collection illuminates these questions by exploring the work of influential twentieth-century artists. Engaging with a wide range of Salle's friends and contemporaries—from painters to conceptual artists such as Jeff Koons, John Baldessari, Roy Lichtenstein, and Alex Katz, among others—How to See explores not only the multilayered personalities of the artists themselves but also the distinctive character of their oeuvres. Salle writes with humor and verve, replacing the jargon of art theory with precise and evocative descriptions that help the reader develop a personal and intuitive engagement with art. The result: a master class on how to see with an artist's eye.

From triangles, rotations and power laws, to cones, curves and the dreaded calculus, Alex takes you on a journey of mathematical discovery with his signature wit and limitless enthusiasm. He sifts through over 30,000 survey submissions to uncover the world's favourite number, and meets a mathematician who looks for universes in his garage. He attends the World Mathematical Congress in India, and visits the engineer who designed the first roller-coaster loop. Get hooked on math as Alex delves deep into humankind's turbulent relationship with numbers, and reveals how they have shaped the world we live in.
