Mobile App Manual: The Blueprint is a starting point for building native mobile applications using web technologies. You'll learn about a process developed using tools like jQuery Mobile and PhoneGap Build, that will allow you to create mobile applications quickly and easily. You'll also learn how to leverage skills typically used to develop desktop websites to create modern hybrid mobile applications, so you can write your code once, and deploy your apps across a wide variety of devices and app stores.

This engaging and accessible textbook explores the challenges and complexities of managing operations in a service industry setting. Comprehensive in scope, this textbook considers key concepts from strategy and operations management from a global services perspective and integrates traditional theory with cutting-edge contemporary examples. Taking a student-centred approach, it gives the reader a solid understanding of the key issues faced by contemporary service organisations. From managing and reviewing risk to managing supplier relationships. Rich pedagogy, integrated online resources and relevant international case studies develop strategic thinking skills and equip students with the essential tools and techniques needed to plan, design, manage and control operations in diverse service industry contexts. This is an ideal textbook for students of service operations management at undergraduate, postgraduate and MBA level.

Google.com is one of the most popular sites on the Internet and is used around the world by millions of people every day. Sure, you know how to "Google it" when you're searching for something--anything!--on the Web. It's plenty fast and easy to use. But did you know how much more you could achieve with the world's best search engine by clicking beyond the "Google Search" button? While you can interface with Google in 97 languages and glean results in 35, you can't find any kind of instruction manual from Google. Lucky for you, our fully updated and greatly expanded second edition to the bestselling Google: The Missing Manual covers everything you could possibly want to know about Google, including the newest and coolest--and often most underused (what is Froogle, anyway?)--features. There's even a full chapter devoted to Gmail, Google's free email service that includes a whopping 2.5 GB of space). This wise and witty guide delivers the complete scoop on Google, from how it works to how you can search far more effectively and efficiently (no more scrolling through 168 pages of seemingly irrelevant results); take best advantage of Google's lesser-known features, such as Google Print, Google Desktop, and Google Suggest; get your website listed on Google; track your visitors with Google Analytics; make money with AdWords and AdSense; and much more. Whether you're new to Google or already a many-times-a-day user, you're sure to find tutorials, tips, tricks, and tools that take you well beyond simple search to Google gurudom.

The Screen Design Manual provides designers of interactive media with a practical working guide for preparing and presenting information that is suitable for both their target groups and the media they are using. It highlights background information and relationships, clarifying them with examples, and encourages the further development of the language of digital media. In addition to the basics of perception and learning psychology, ergonomics, communication theory, imagery research, and aesthetics, the book also considers design navigation and orientation elements. Guidelines and checklists, along with the comprehensive design of the book, support the transfer of information into practice. Frank Thissen teaches multimedia didactics and information design at the University of Applied Sciences in Stuttgart. For over 10 years he has been developing computer based training.
