There are two main design considerations that will drive the type of hand pump you need - deep well or shallow well. Deep well pumps are more expensive and can retrieve water from several hundred feet below ground. Shallow well pumps or cistern pumps are designed to draw from sources that are less than 20 feet below ground. Ease

Download Free Manual Water Pump For Deep Well of Installation

The Best Hand Pumps for Your Well (Deep or Shallow) * The ... Requires an area approximately 2m Ø for installation and is capable of manual pumping speeds up to 40 strokes per minute. Approximate discharge at 40 strokes per minute is around 900 litres per hour. The pump is suitable for 100mm - 150mm Ø bore wells and recommended for water level setting depth of 20-45m.
