Books by Robin Cook and Complete Book Reviews

Along with Maria Reiche, a German mathematician and archaeologist, Kosok proposed the figures were markers on the horizon to show where the sun and other celestial bodies rose. Another geoglyph ...

With his signature blend of suspense and science, Robin Cook delivers an electrifying page-turner that delves into the murky ethics of developing genomic medicine and modern-day health care... As her relationship with Dr. Jack Stapleton begins to unravel, Dr. Laurie Montgomery starts investigating the inexplicable deaths of young, healthy people after successful routine surgery. She discovers that the deaths might be intentional—the work of a remarkably clever serial killer with a shocking motive. And then Laurie is hit with more devastating news: she might be carrying the genetic marker for breast cancer. As the need for answers becomes more urgent, Laurie is pulled into the nightmare as a potential victim herself. With time winding down, she and Jack must put aside the tensions between them in a race to connect the dots—and save Laurie ' s life...

The Butthole Surfers remain one of the most enigmatic bands in the history of rock music. Most of their records have no information of any kind, and often with the suggestion that you play them at 69 rpm.... They lived like nomads through much of the 1980s, and built their reputation upon tours that never ended, and shows that resembled hedonistic acid tests. They left a heap of former band members in their wake, and have often alienated as many fans as they've attracted. Here for the first time is the complete story of one of the most controversial and dangerous bands to have emerged from the ashes of the punk rock movement. 'Let's Go to Hell' compiles the scattered memories into the first comprehensive overview of the band. Featuring exclusive interviews, tons of rare and unpublished photographs, and analysis of the band's vast recorded (and unrecorded) efforts, 'Let's Go to Hell' finally tells the story that was thought (and often hoped) would never be told...

This book brings together authoritative information about the child/dog bond as it is manifested with family dogs, visiting therapy dogs, and service dogs trained to assist children with disabilities. Despite the widely accepted view that participating in a dog ' s care and interacting with dogs in behaviorally healthy ways is a route to becoming responsible and compassionate, research on this complex dynamic is difficult to design, time-consuming to collect, and challenging to analyze. This volume synthesizes theory, research, and practice, bringing all to bear upon child/dog interactions in homes, schools, libraries, and the community at large. Children, Dogs and Education serves as a handbook for a diverse group of adults who seek to build positive relationships between children and dogs—parents/families, professional dog trainers, teachers, librarians, mental health professionals, health care professionals, and university faculty. The study of interactions between human and nonhuman animals has captured the imagination of an international community of researchers from many different fields and professions. Even though dogs are ubiquitous in the lives of most children, studies of children ' s interactions with dogs in families and communities are lacking. Most of the previous research on the human-canine bond has focused on adolescents and adults or, even when younger children are the focus, it has tended to rely on parents to speak for children. There are three features of this book that make it unique. First, it goes beyond exploring the child/dog bond to examine additional important issues, including: children ' s concepts of responsible care, their ability to interpret dogs ' behavioral cues, and their ideas about canine behavioral issues/training. Second, unlike most other work to date, it represents children ' s voices through cases, interviews, and drawings. Finally, the contributors to this edited work use their collective wisdom to draw educational

implications and suggest direction in preparing the next generation of dog guardians.

The classic work on the music of Afrofuturism, from jazz to jungle *More Brilliant than the Sun: Adventures in Sonic Fiction* is one of the most extraordinary books on music ever written. Part manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between electronic music history, media theory, science fiction and Afrodiasporic studies, *More Brilliant than the Sun* is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by filmmaker John Akomfrah and producer Steve Goodman aka kode9.

A 2018 BOOK OF THE YEAR ' An inspirational must-read. ' Evening Standard ' A very important book. ' Will Gompertz, BBC ' A motivational, inspirational oral history. ' Nikesh Shukla, iNews ' Don ' t sleep on it... the future is looking #Merky. ' Metro _____ ' It ' s been a long time coming, I swear... ' In four years Stormzy has risen from one of the most promising musicians of his generation to a spokesperson for a generation. *Rise Up* is the story of how he got there. It ' s a story about faith and the ideas worth fighting for. It ' s about knowing where you ' re from, and where you ' re going. It ' s about following your dreams without compromising who you are. Featuring never-before-seen photographs, lyrics and contributions from Team #Merky, *Rise Up* is the #Merky story, and the record of a journey unlike any other. _____ Edited and Co-written by Jude Yawson Contributions by Team #Merky Images by Kaylum Dennis

Visual art has been tied to hip-hop culture since its emergence in the 1970s. Commentary on these initial connections often emphasizes the importance of graffiti and fashion during hip-hop ' s earliest days. Forty years later, hip-hop music has grown into a billion-dollar global industry, and its influence on visual art and society has also expanded. This book-length printed edition of *Arts* collects essays by scholars who explore this evolving influence through their work in art education, cultural theory, and visual culture studies. The topics covered by these authors include discussions on identity and cultural appropriation, equity and access as represented in select works of art, creativity and copyright in digital media, and the use of fine art tropes within the sociocultural history of hip-hop. As a collected volume, these essays make potentially important contributions to broadening the narrative on art education and hip-hop beyond the topics of graffiti, fashion, and the use of cyphers in educational contexts.

In this first integrated view, practically each of the world's leading experts has contributed to this one and only authoritative resource on the topic. Bringing systems biology to cellular energetics, they address in detail such novel concepts as metabolite channeling and medical aspects of metabolic syndrome and cancer.

'An inspired and intuitive navigation of the drone continuum . . . with a compass firmly set to new and enlightening psychedelic truths' BECK *Monolithic Undertow* alights a crooked path across musical, religious and subcultural frontiers. It traces the line from ancient traditions to the modern underground, navigating archaeoacoustics, ringing feedback, chest plate sub-bass, avant-garde eccentricity, sound weaponry and fervent spiritualism. From Neolithic beginnings to bawdy medieval troubadours, Sufi mystics to Indian raga masters, cone shattering dubwise bass, Hawkwind's *Ladbroke Grove* to the outer reaches of Faust and Ash Ra Temple; the hash-fueled fug of *The Theatre of Eternal Music* to the cough syrup reverse hardcore of Melvins, seedy VHS hinterland of *Electric Wizard*, ritual amp worship of Earth and Sunn O))) and the many touch points in between, *Monolithic Undertow* explores the power of the drone - an audio carrier vessel capable of evoking womb like warmth or cavernous dread alike. In 1977 Sniffin' Glue verbalised the musical zeitgeist with their infamous 'this is a chord; this is another; now form a band' illustration. The drone requires neither chord nor band, representing - via its infinite pliability and accessibility - the ultimate folk music: a potent audio tool of personal liberation. Immersion in hypnotic and repetitive sounds allows us to step outside of ourselves, be it chant, a 120dB beasting from Sunn O))), standing front of the system as Jah Shaka drops a fresh dub or going full headphone immersion with Hawkwind. These experiences are akin to an audio portal - a sound Tardis to silence the hum and fizz of the unceasing inner voice. The drone exists outside of us, but also - paradoxically - within us all; an aural expression of a universal hum we can only hope to fleetingly channel...

A selection of Repeater authors choose their favourite forgotten horror stories for this new anthology, with each also writing a critical introduction for the story of their choice. A selection of Repeater authors choose their favourite horror stories for this new anthology, with each writing a critical introduction for the story of their choice. Edited by novelist and Repeater publisher Tariq Goddard and "horror philosopher" Eugene Thacker, *The Repeater Book of the Occult* is a new anthology of horror stories that explores the ever-shifting boundaries between the natural and supernatural, between the real and the unreal. As the editors note, "In the grey zone between what appears and what is, lies horror. But horror writing is also a certain disposition, a way of thinking based on a suspicion regarding the world as it is given to us, and a doubt regarding the accepted ways of explaining that world to us - and for us." *The Repeater Book of the Occult* includes introductions by Repeater authors such as Leila Taylor, Carl Neville, Rhian E Jones, and Elvia Wilk, and features horror classics by Algernon Blackwood, Charlotte Perkins Gilman, and Edgar Allan Poe, as well as forgotten gems by authors such as W.W. Jacobs, Mark Twain, and Sheridan Le Fanu.

Read & Burn is the first serious, in-depth appraisal of Wire, one of the most influential British bands to emerge during the punk era. If Wire were briefly a punk band, however, it was largely by historical accident. Despite the fact that they had complicated and transformed that category almost before they'd begun, they seem never to have quite escaped the label. Be it punk, post-punk, or art-punk, critics have clung onto the p-word in an attempt to capture the essence of Wire's innovative uniqueness. But their story - which honours punk's original yet quickly forgotten commitment to the new - is one of constant remaking and remodelling, one that stubbornly resists reduction to a single identity. As a result, the group's projects have always balanced uneasily between artistic endeavour and the need for commercial sustainability, played out against the backdrop of the musicians' perennially complex creative relationships. Tracing Wire's diverse output from 1977 up until the present, *Read & Burn* seeks to do justice to their highly influential and restlessly inventive body of work.
