Model Driven Information Systems
Engineering for Networked Organizations.
Modern businesses and IT systems are
facing an ever more complex environment
characterized by openness, variety, and
change. Organizations are becoming less
self-sufficient and increasingly dependent
on business partners and other actors.

File Type PDF Oracle 9i User Guide

These trends call for openness of business as well as IT systems, i.e. the ability to connect and interoperate with other systems. Furthermore, organizations are experiencing ever more variety in their business, in all conceivable dimensions. The different competencies required by the workforce are multiplying. In the same

File Type PDF Oracle 9i User Guide

way, the variety in technology is overwhelming with a multitude of languages, platforms, devices, standards, and products. Moreover, organizations need to manage an environment that is constantly changing and where lead times, product life cycles, and partner relationships are shortening. The demand of

File Type PDF Oracle 9i User Guide

having to constantly adapt IT to changing technologies and business practices has resulted in the birth of new ideas which may have a profound impact on the information systems engineering practices in future years, such as autonomic computing, component and services marketplaces and dynamically generated software.
