Respironics

Quality is a composite term encompassing many characteristics

of foods. These include color, aroma, texture, general nutrition, shelf-life, stability, and possible presence of undesirable constituents.

Obviously deterioration of quality

Read Free

Philips

may lead to changes in the attributes that characterize the food in its fresh or freshly processed state. In addition, quality enhancement of products may be carried out using appropriate processing techniques.

Interaction of different components present

Read Free

Philips

with one another
could have a profound
effect on sensory
quality of products.

Meanwhile, presence
of extraneous matter
such as pesticides
and debris may also
contribute to a
compromise in the
quality of foods. In
addition, processing
often brings about
changes in many

Read Free

Philips

attributes of food including its nutritional value. Thus, examination of process-induced changes in food products is important. In this book, a cursory account of quality attributes of fresh and processed foods is provided. The book is of interest to food scientists, nutritionists
