study. One fundamental prerequisite is fluency in a “basic language”; this provides a common framework in which to exchange ideas, care-fully formulate problems and actively work toward their solutions. In modern science and engineering, college mathematics has become this “basic language”, beginning with precalculus, moving into calculus and

First let's look at the easiest way to create a new function from existing functions: performing basic arithmetic operations.

Example 1: If $f(x) = x^2 - 2x - 3$ and $g(x) = x + 1$, find the following. Note that the domain of the new function is all real numbers except for $x = -1$, which is different than the domain of both $f(x)$ and $g(x)$.
