Protective Relays Application Guide - AbeBooks The CCP13D relay is a three-phase, high-speed, extremely sensitive power relay. It is made up of three single-phase cup type units all coupled to a common shaft. Because of its very low pick-up range, this device is basically a reverse power relay. GENERAL APPLICATION The GGP53C, CAP15B and CCP13D relays are all three-phase devices. Under normal balanced

Protective Relays Application Guide Gec Alsthom In electrical engineering, a protective relay is a relay device designed to trip a circuit breaker when a fault is detected. The first protective relays were electromagnetic devices, relying on coils operating on moving parts to provide detection of abnormal operating conditions such as over-current, overvoltage, reverse power flow, over-frequency, and under-frequency. Microprocessor-based digital protection relays now emulate the original devices, as well as providing types of protection and su
