The solution is to deactivate the port version of R and install it from download. Then reinstall the png package. `sudo port deactivate R`. Use “ deactivate R@3.3.2 ” or similar if a specific version is installed. Then install R from CRAN. Finally, use RStudio to remove the png package and re-install it. Restart RStudio one more time and it should work.

`./configure --prefix=/where/you/want/R/to/go` This causes `make install` to install the R executable to `'/where/you/want/R/to/go/bin'`, and so on. The prefix of the installation directories can be seen in the status message that is displayed at the end of configure. You can install into another directory by using `make prefix=/path/to/here install`
