All the methods of restoration of human matter with the help of concentration on number sequences given in this book can be used with preventive and sanitary purposes, for rejuvenation, and in case of necessity, to restore the matter, regardless of the initial data, on the basis of which the matter is restored. When using the described methods in paragraphs 1-9 in the introduction you can consider the following: -With the aim of prophylaxis it is expedient to make rehabilitation with the simultaneous spreading the effect of concentration on number sequences for the future. -For rejuvenation it is expedient to concentrate in succession at first on the number sequence, located in the content (of the book), taking into account the task of eternal development, and then concentrate on the matter which you are locally rejuvenating. -Restoring the matter of the body, you can perform concentration on number sequences in succession with the help of the various methods given in this book. You can use the number sequences corresponding to the matter being restored, as well as the number sequences of the area, which includes the matter you are restoring. -If it is necessary to restore the matter after biological death, then you should at first concentrate on the numbers consecutively from left to right, then in reverse order - from right to left. The spiritual impulse creating human matter makes it possible to expand the methods of restoration. Restoring the human matter one must strive to develop the spiritual level to the state in which the matter is created and functions by the spiritual activity, along with the biological principles and principles of events. Such spiritual state in the process of implementation of the methods of the eternal development must ensure full restoration of human matter, regardless of the initial data and any circumstances.

(ENGLISH EDITION), Part 2. All the methods of restoration of human matter with the help of concentration on number sequences given in this book can be used with preventive and sanitary purposes, for rejuvenation, and in case of necessity, to restore the matter, regardless of the initial data, on the basis of which the matter is restored. When using the described methods in paragraphs 1-9 in the introduction you can consider the following: -With the aim of prophylaxis it is expedient to make rehabilitation with the simultaneous spreading the effect of concentration on number sequences for the future. -For rejuvenation it is expedient to concentrate in succession at first on the number sequence, located in the content (of the book), taking into account the task of eternal development, and then concentrate on the matter which you are locally rejuvenating. -Restoring the matter of the body, you can perform concentration on number sequences in succession with the help of the various methods given in this book. You can use the number sequences corresponding to the matter being restored, as well as the number sequences of the area, which includes the matter you are restoring. -If it is necessary to restore the matter after biological death, then you should at first concentrate on the numbers consecutively from left to right, then in reverse order - from right to left. This book presents a method for improving health by focusing on seven-digit, eight-digit, and nine-digit numbers, which the author obtained in the course of his practical work. Seven-digit numerical sequences form the basis of the system. For further specific conditions, eight-digit and nine-digit numbers are given in the table of contents, as well as throughout the book.The picture used in the design of the cover is an author's picture of Grigori Grabovoi from his book of images "Manifestations of Eternity". Foreshortening of images, in this book, fills you with eternity.

When it comes to implementing successful ecological restoration projects, the social, political, economic, and cultural dimensions are often as important as-and sometimes more important than-technical or biophysical knowledge. Human Dimensions of Ecological Restoration takes an interdisciplinary look at the myriad human aspects of ecological restoration. In twenty-six chapters written by experts from around the world, it provides practical and theoretical information, analysis, models, and guidelines for optimizing human involvement in restoration projects. Six categories of social activities are examined: collaboration between land manager and stakeholders ecological economics volunteerism and community-based restoration environmental education ecocultural and artistic practices policy and politics For each category, the book offers an introductory theoretical chapter followed by multiple case studies, each of which focuses on a particular aspect of the category and provides a perspective from within a unique social/political/cultural setting. Human Dimensions of Ecological Restoration delves into the often-neglected aspects of ecological restoration that ultimately make the difference between projects that are successfully executed and maintained with the support of informed, engaged citizens, and those that are unable to advance past the conceptual stage due to misunderstandings or apathy. The lessons contained will be valuable to restoration veterans and greenhorns alike, scholars and students in a range of fields, and individuals who care about restoring their local lands and waters.

There is a strong healing force within all living systems that would like to magnify from within that which is reaching for health and well being. How do we connect with and awaken that force? How can we maintain steady interaction and communication with it? The Human Restoration Project offers a map that honors both natural law and individual preference to restore us to our rightful place as strong, healthy, robust people. The Human Restoration Project is here to show you for yourself the magnificent healing potential human beings have been endowed with from the very beginning of our evolution upon this planet. Through proper care and maintenance of the body, mind and spirit you will shake off inertia and confusion and learn how to awaken your inner physician. Through Deep Listening, reducing inflammation, understanding posture, breathing, and how your thoughts change your chemistry you will be inspired to correct faulty life style habits and be returned to vibrant health. What is Artful Living? How does resiliency play a role in your inner landscape? Why do you need to spend time on the earth every day? How can we make better choices in the food we eat and the thoughts we think? Why is it important to respect the Free Will we have been given? This is our highest potential. We own this potential, all we need to do is learn how to re-awaken it from the sleep of cultural myths and outdated information. Let us rise up and remember how to live in harmony with the natural order of the very earth that created us and be restored to our greatness as humans.

In a time of uncertainty about our environmental future—an eye-opening global tour of some of the most wounded places on earth, and stories of how a passionate group of eco-restorers is leading the way to their revitalization, Award-winning science journalist Judith D. Schwartz takes us first to China's Loess Plateau, where a landmark project has successfully restored a blighted region the size of Belgium, lifting millions of people out of poverty. She journeys on to Norway, where a young indigenous reindeer herder challenges the most powerful orthodoxies of conservation—and his own government. And in the Middle East, she follows the visionary work of an ambitious young American as he attempts to re-engineer the desert ecosystem, using plants as his most sophisticated technology. Schwartz explores regenerative solutions across a range of landscapes: deserts, grasslands, tropics, tundra, Mediterranean. She also highlights various human landscapes, the legacy of colonialism and industrial agriculture, and the endurance of indigenous knowledge. The Reindeer Chronicles demonstrates how solutions to seemingly intractable problems can come from the unlikeliest of places, and how the restoration of local water, carbon, nutrient, and energy cycles can play a dramatic role in stabilizing the global climate. Ultimately, it reveals how much is in our hands if we can find a way to work together and follow nature's lead.
