Notes: Rules of series and parallel circuits are very important for students to comprehend. However, a trend I have noticed in many students is the habit of memorizing rather than understanding these rules. Students will work hard to memorize the rules without really comprehending why the rules are true, and therefore often fail to recall or apply the rules properly.

Series-Parallel Circuits If we combined a series circuit with a parallel circuit we produce a Series-Parallel circuit. •R1 and R2 are in parallel and R3 is in series with $R1 \parallel R2$. The double lines between R1 and R2 is a symbol for parallel. We need to calculate $R1 \parallel R2$ first before adding R3.
