Much of the innovative programming that powers the Internet, creates operating systems, and

produces software is the result of "open source" code, that is, code that is freely distributed--as opposed to being kept secret--by those who write it. Leaving source code open has generated some of the most sophisticated developments in computer

technology, including, most notably, Linux and Apache, which pose a significant challenge to Microsoft in the marketplace. As Steven Weber discusses, open source's success in a highly competitive industry has subverted many assumptions about

how businesses are run, and how intellectual products are created and protected.

Traditionally, intellectual property law has allowed companies to control knowledge and has guarded the rights of the innovator, at the expense of industry-wide cooperation. In

turn, engineers of
new software code
are richly rewarded;
but, as Weber shows,
in spite of the
conventional wisdom
that innovation is
driven by the
promise of individual
and corporate
wealth, ensuring the
free distribution of
code among

In the world of open-

Groundbreaking new research shows that by grabbing hold of the three-step "loop" all habits form in our

brains--cue, routine,
reward--we can
change them, giving
us the power to take
control over our lives.

"We are what we
repeatedly do," said
Aristotle. "Excellence,
then, is not an act,
but a habit." On the
most basic level, a
habit is a simple
neurological loop:
there is a cue (my

Access Free Weber Genesis

mouth feels gross), a routine (hello, Crest), and a reward (ahhh, minty fresh).

Understanding this loop is the key to exercising regularly or becoming more productive at work or tapping into reserves of creativity.

Marketers, too, are learning how to exploit these loops to

boost sales; CEOs and coaches are using them to change how employees work and athletes compete. As this book shows, tweaking even one habit, as long as it's the right one, can have staggering effects. In *The Power of Habit*, award-winning New York Times business
